

19th International Conference applied computing

8 - 10 November 2022

Lisbon, Portugal

Types of Contributions

Full Papers« Short Papers« Reflection Papers« Posters /Demonstrations« Tutorials« Panels« Invited Talks« Doctoral Consortium« Corporate Showcases«

Topics of Interest

All areas related to Applied Computing are of interest, including, but not being limited, to the following areas:

Application Fields

- eCommerce and ePayment
- eLearning
- eHealth and eSports
- IT services
- Mobile computing
- Knowledge management and distribution

Fundamental Concepts and Engineering

- Algorithms
- Data bases and data mining
- Information Systems
- Information sourcing and aggregation
- Programming languages and concepts
- Security and Privacy

Performance

- Distributed and parallel systems
- Cloud Computing
- Evaluation and Assessment
- Intelligent systems
- Large-scale applications
- Local and distributed storage

Communication

- IoT
- Industry 4.0
- Mobile Systems and Networks
- Protocols, Standards and Mark-up Languages
- Sensor Networks
- WWW Applications and Technologies

Usability

- Automation of Services
- Human-centred Computing
- Multimedia and Visualization
- Modalities of User Interfacing
- Personalization and empathic systems
- Virtual Reality

Hardware scope

- Embedded Computing
- Environment-friendly Constructions
- Mobile Aspects
- Realization of IoT nodes
- Security concepts and devices
- Wideband Information streaming

Organized by:

iadis

international association for development of the information society
